Cambodia's foreign reserves reach \$25 billion milestone Cambodia's international reserves reached \$24.8 billion in the first half of 2025, a 10.4% increase from December 2024. This is a high level for a developing country, indicating the country's resilience amidst a volatile global environment. Key factors contributing to this increase include rising gold prices, overseas investment revenue, favorable exchange rate movements, higher deposits from banks and financial institutions, and mandatory reserves. The National Bank of Cambodia (NBC) has increased green bonds and ESG bonds. Despite global uncertainties, the Cambodian economy remained resilient, with low inflation and stable exchange rates. NBC Governor Chea Serey emphasized the importance of sound economic fundamentals and flexible monetary policy for maintaining macroeconomic stability. International reserves are crucial for social and economic progress, supporting public institutions, and acting as a buffer against threats. (Source: Khmer Times)
